Montreal Injection pump shipping instructions

1. Scrape and clean the exterior of the pump for shipping.
2. Remove the rear inspection plate (4 screws).
3. Stand the pump upright for one day to drain the oil. Replace the (4) screws finger tight.
4. Place the pump in a sealed plastic bag.
5. Pack the injectors in a small bag.
6. Pack the Actuator between two sections of cardboard for protection. Do not bend the small tube.
7. REMOVE THE LOWER BASE, AND PACK SEPARATELY AND CAREFULLY AS THEY ARE EASILY DAMAGED IN SHIPPING.
8. A strong but compact cardboard box works very well. For best results, please pack the box within a box. Use Bubble wrap or wadded up newspaper all around the corners of the pump. **Please do not use foam pellets of any kind:** pack as tight as possible to protect from rough handling and impact.
9. **It is important to include previous emails along with your name, mailing address, and contact info inside the box.**
10. Wrap and compress the box with generous layers of stretch tape. If the contents rattle or shift, you must open the box and re-pack as needed.
11. Shipping Address:
 - a. If you choose UPS: Ingram Enterprises, Inc.
15613 Petersen Road, Bldg. C
Burlington, WA 98233 USA
 - b. If you choose FedEx or DHL: (Items under 40 lbs.)
Wes Ingram
12047 Hilynn Drive
Burlington WA, 98233 USA

STOP: DID YOU INCLUDE A NOTE IN THE BOX WITH YOUR NAME, ADDRESS, PHONE NUMBER AND EMAIL ADDRESS?
